P5 left

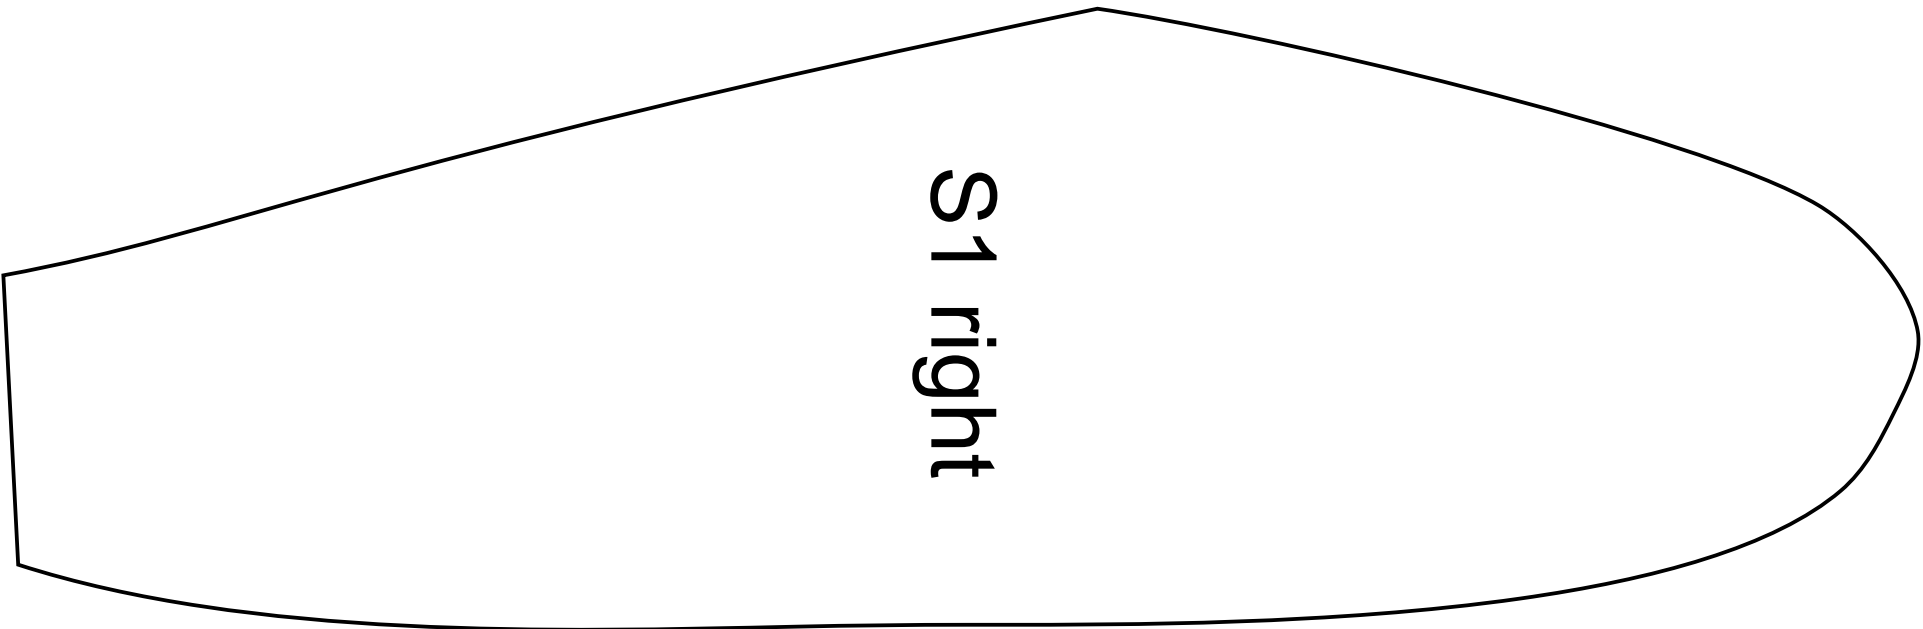

P5 right

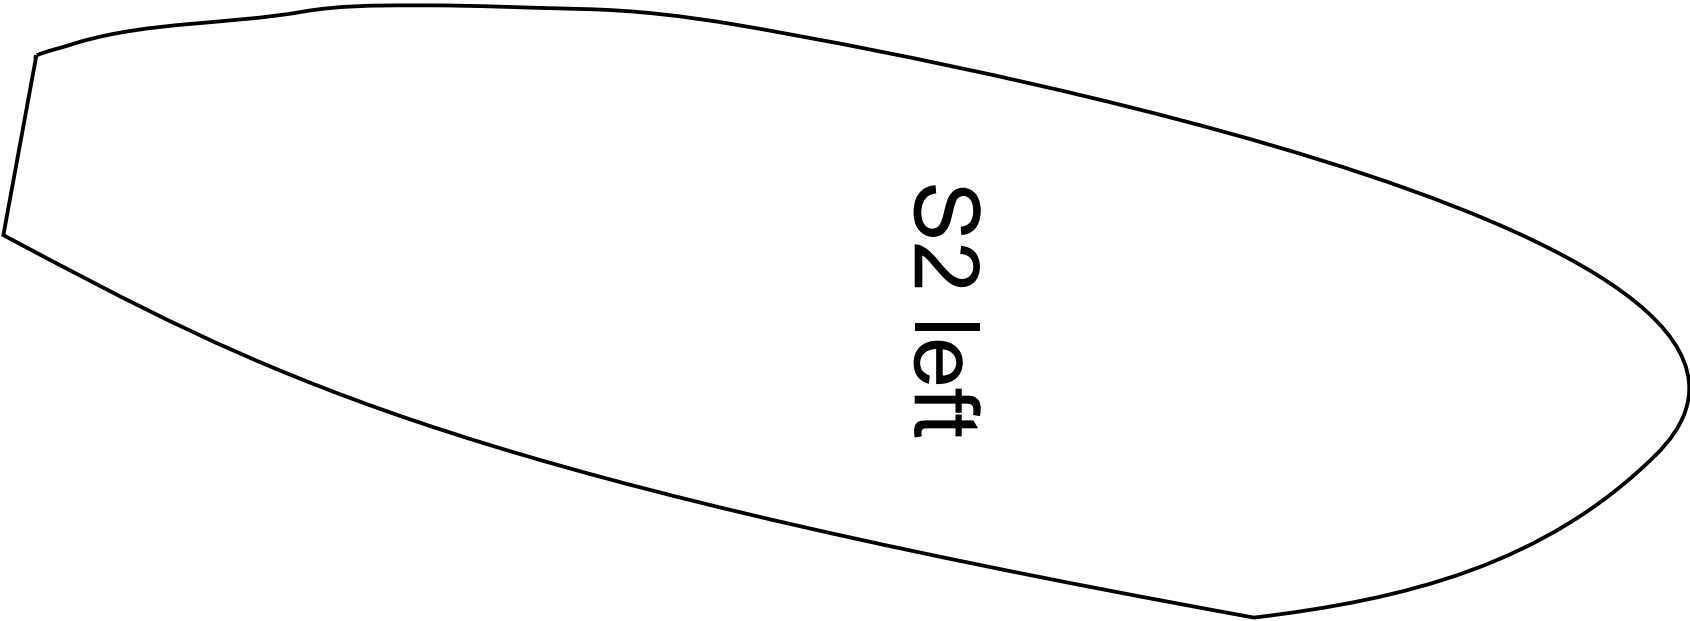

A diagram of a shoe pattern for the left foot. The pattern is elongated and tapers towards the heel. It has a straight edge on the left side and a curved edge on the right side. The text 'S1 left' is written vertically in the center.

S1 left

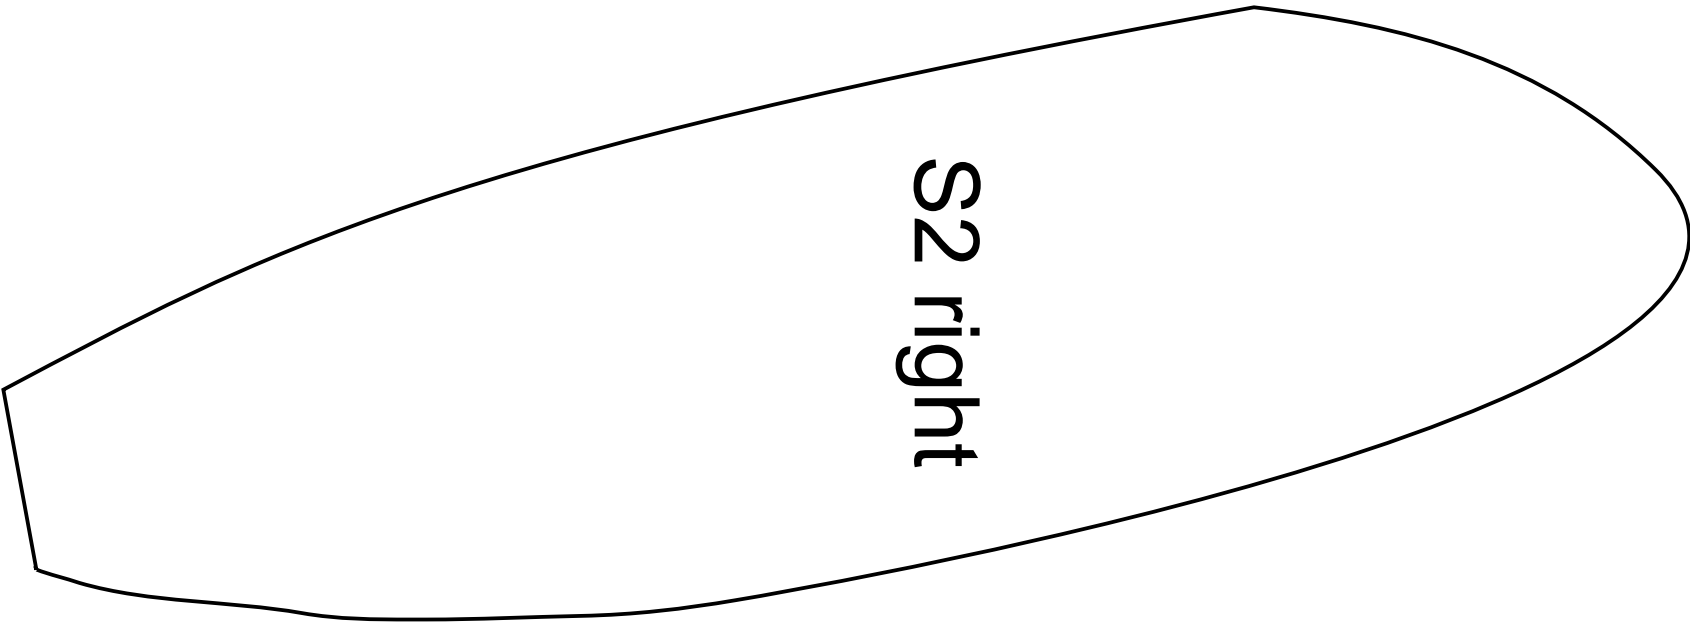

A diagram of a shoe pattern for the right foot. The pattern is elongated and tapers towards the heel. It has a straight edge on the right side and a curved edge on the left side. The text 'S1 right' is written vertically in the center.

S1 right

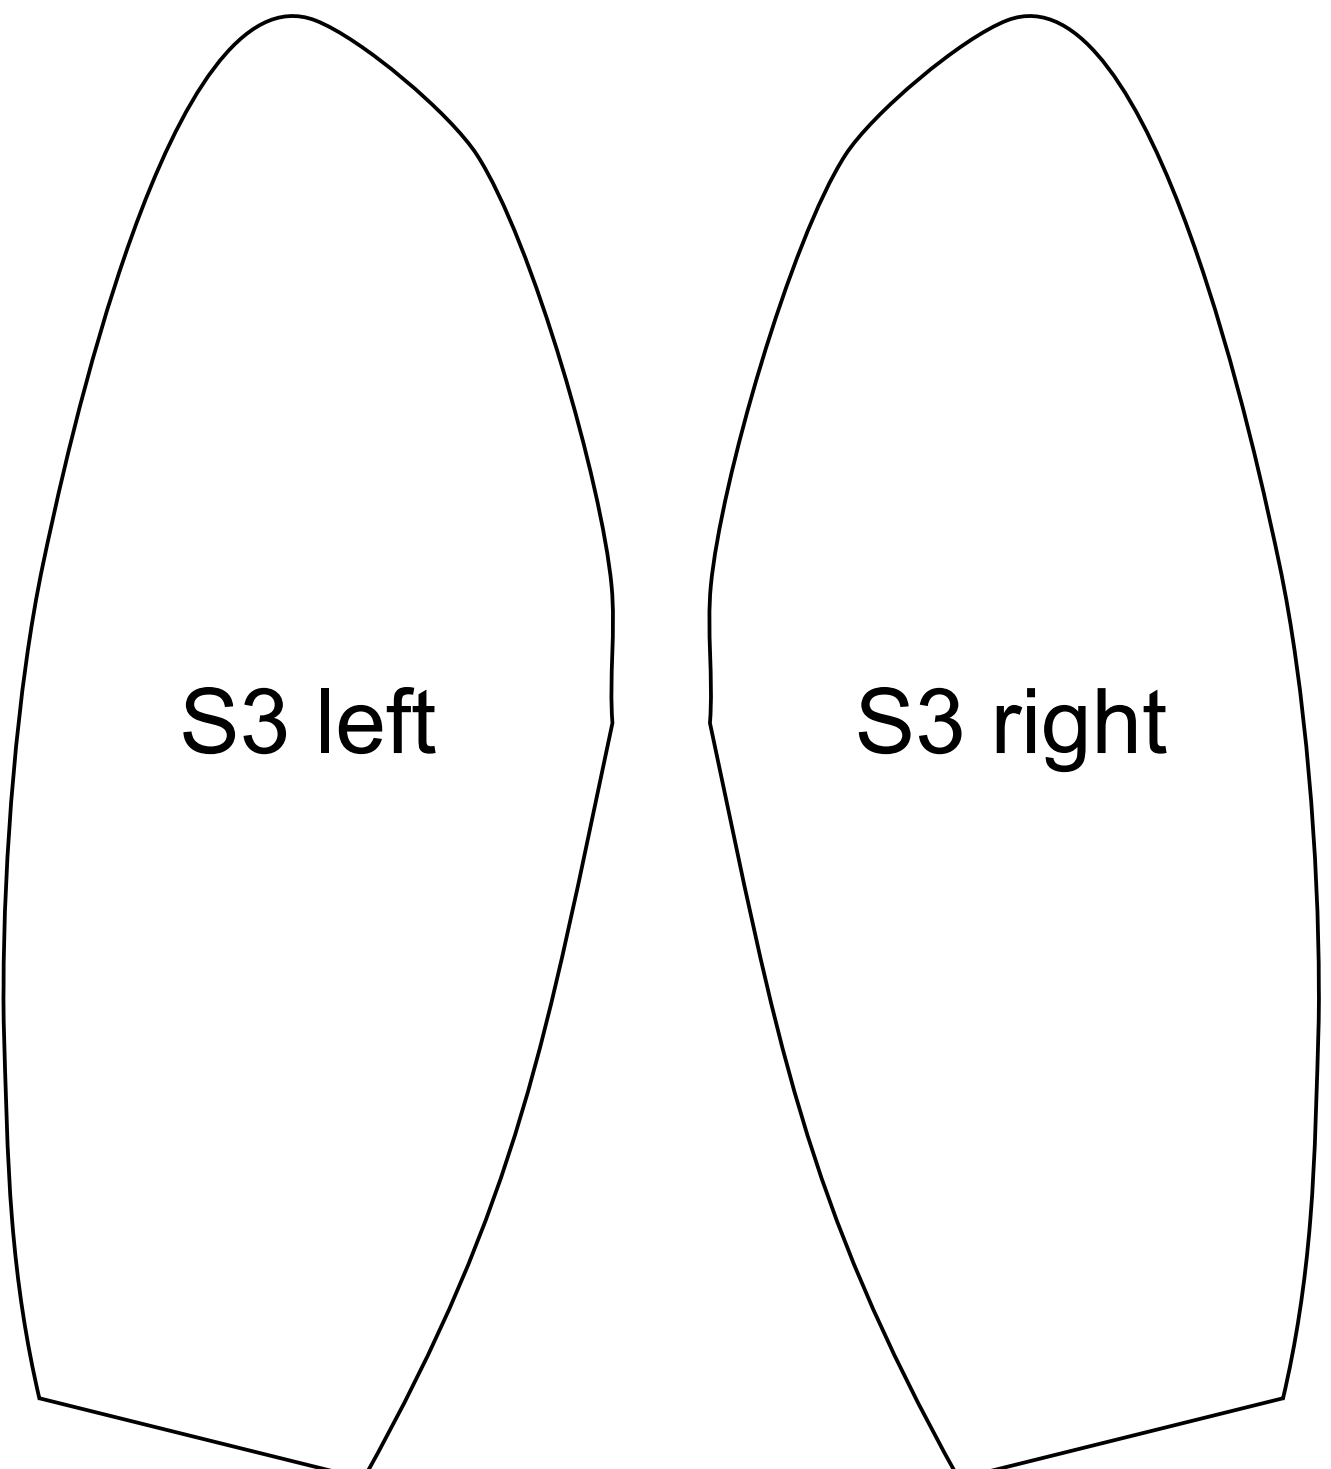

A diagram of a left ventricle cross-section, oriented vertically. The shape is elongated and somewhat triangular, with a rounded apex at the top and a wider base at the bottom. The interior is white, and the boundary is a solid black line.

S2 left

A diagram of a right ventricle cross-section, oriented vertically. The shape is elongated and somewhat triangular, with a rounded apex at the top and a wider base at the bottom. The interior is white, and the boundary is a solid black line.

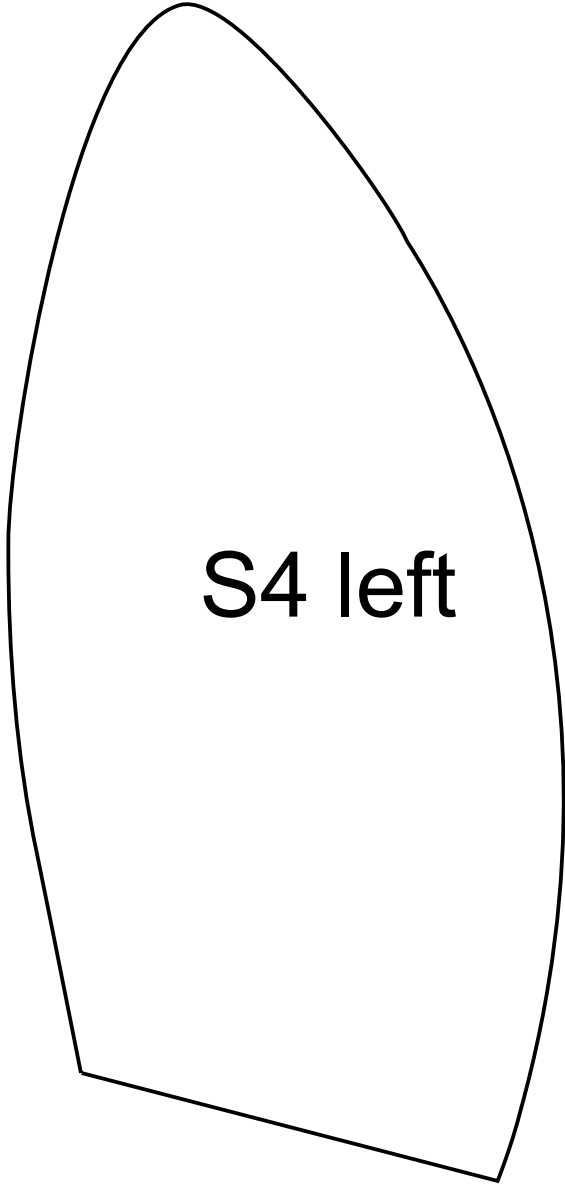

S2 right

The diagram consists of two identical, vertically oriented, teardrop-shaped regions. Each region is defined by a smooth, curved black outline. The left region is labeled 'S3 left' and the right region is labeled 'S3 right'. The two regions are positioned side-by-side, with a small gap between them, and they overlap slightly at their top and bottom points.

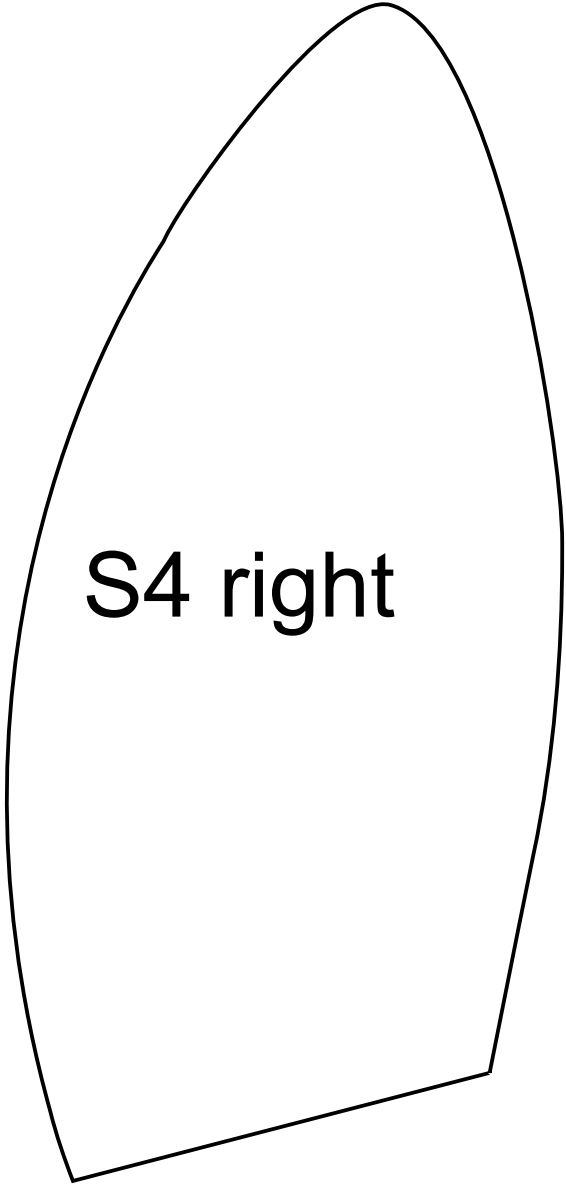

S3 left

S3 right

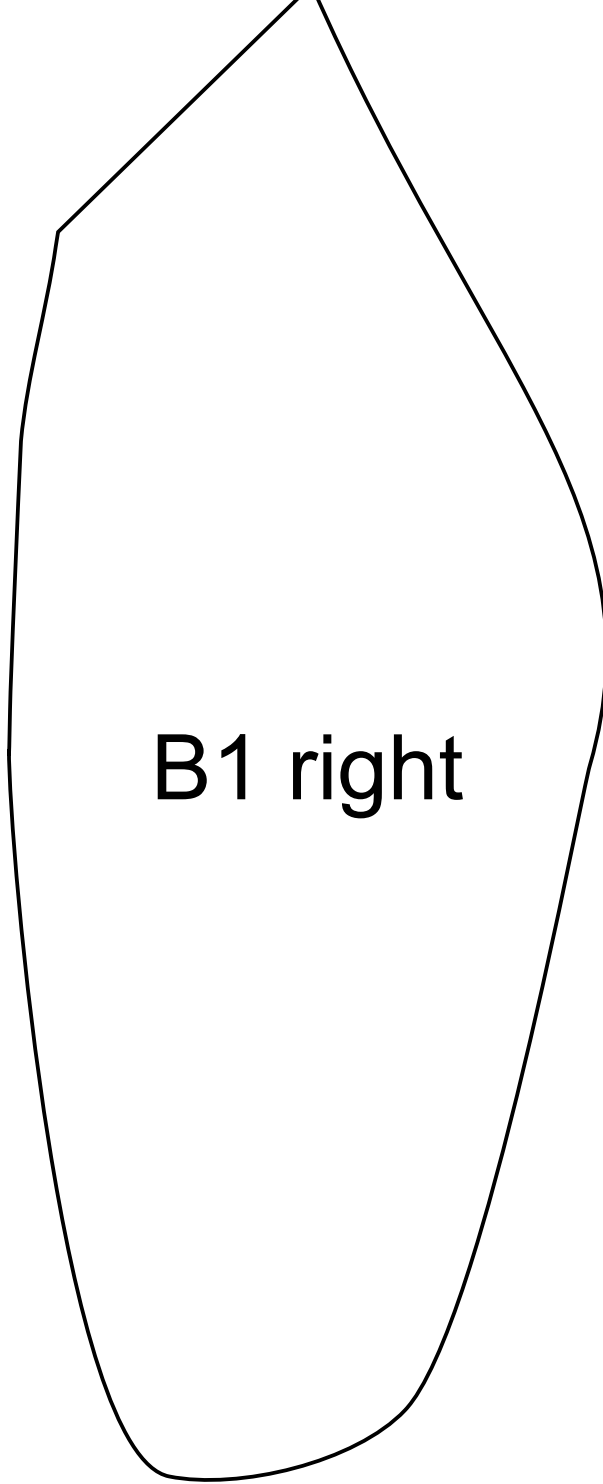

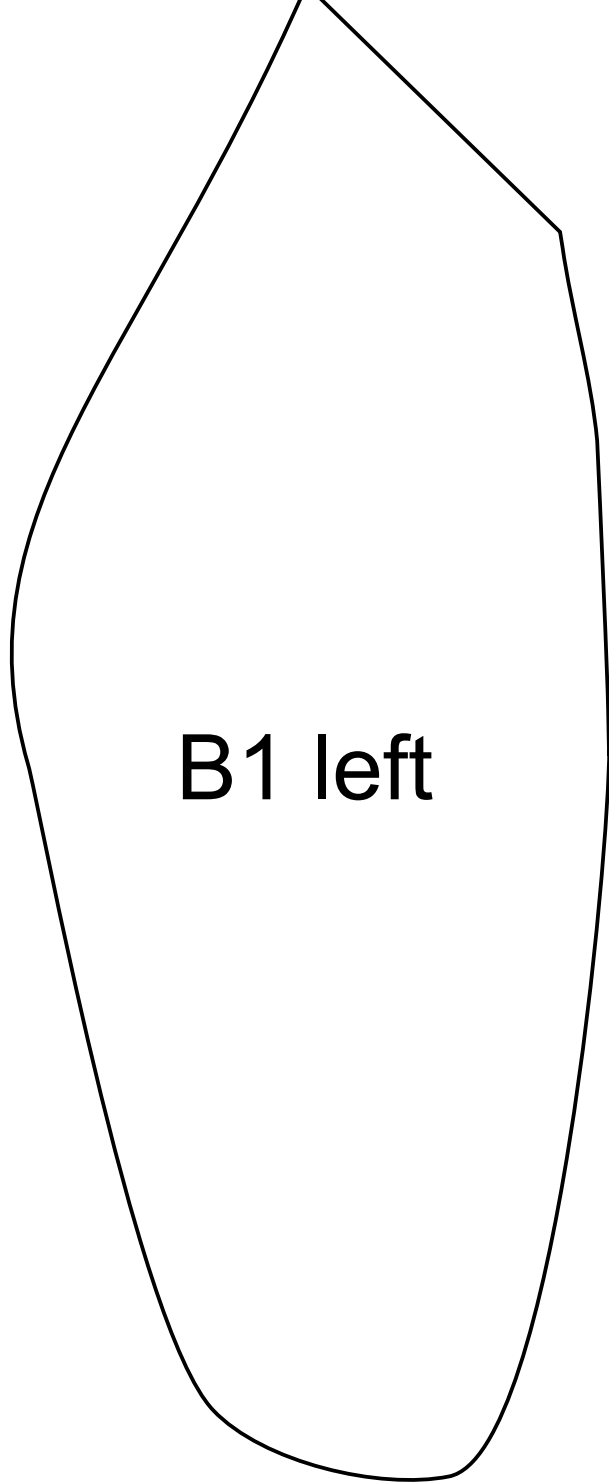

S4 left

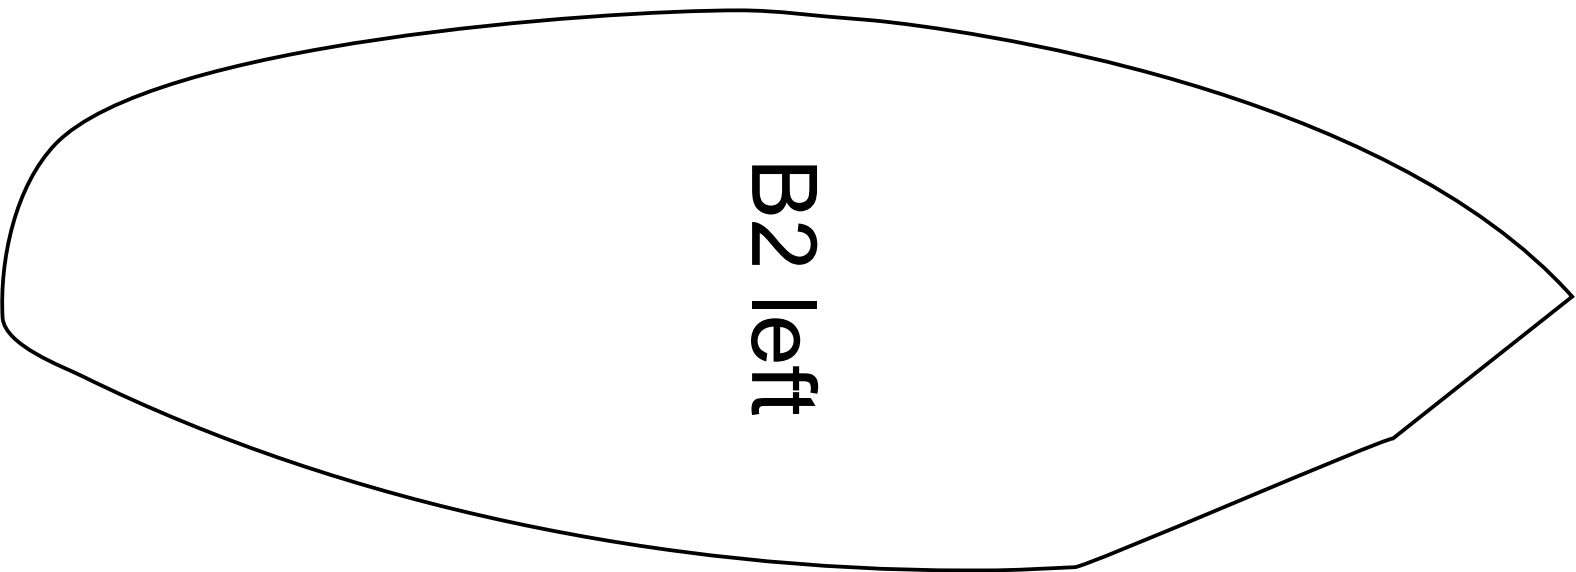

A diagram of a heart shape, specifically a left S4 heart. The shape is elongated and pointed at the top, with a small indentation at the bottom. It is outlined in black and contains the text 'S4 left' in the center.

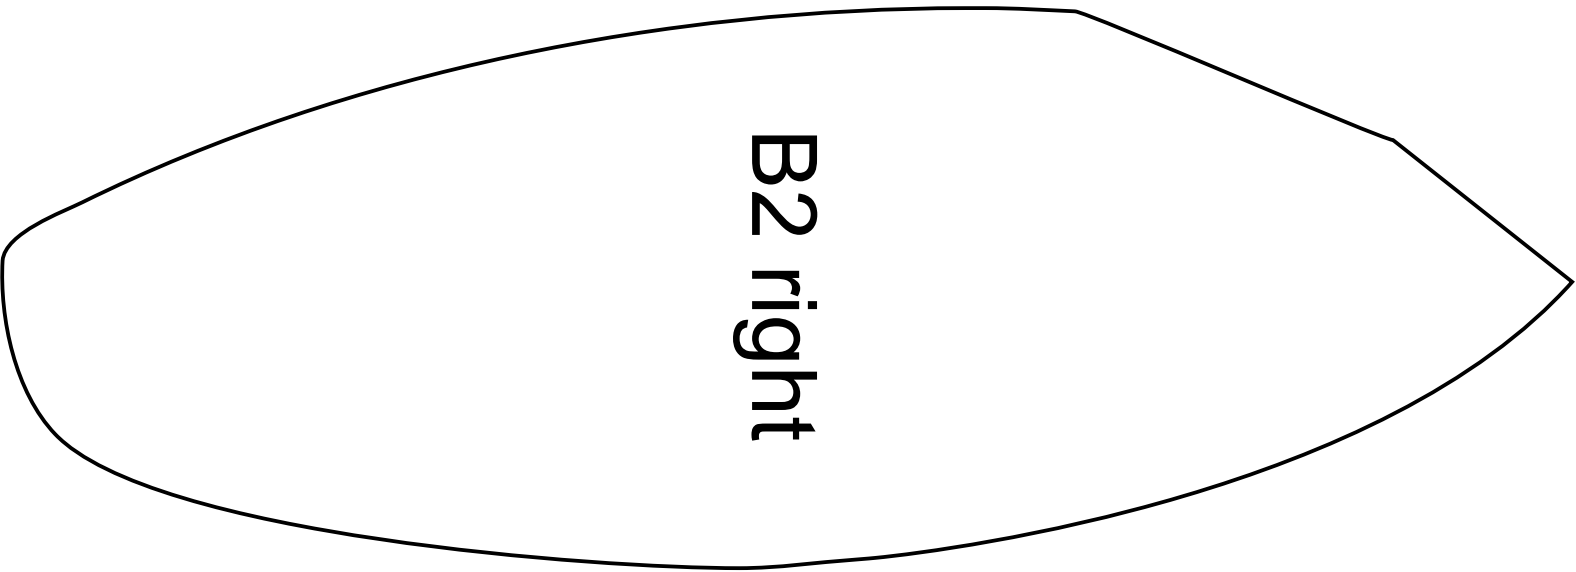

S4 right

A diagram of a heart shape, specifically a right S4 heart. The shape is elongated and pointed at the top, with a small indentation at the bottom. It is outlined in black and contains the text 'S4 right' in the center.
